## Nuspan structural insulated closed floor panel installation:

### Key

- 1 Nuspan pre-insulated slab, 300mm or 375mm deep. Slabs can be end-bearing or side-bearing.
- 2 Nominal 10mm self-levelling compound. Thicker screed layers are also acceptable.
- a robustdetails® separating wall. Refer to Table 6a in the Introduction and relevant Robust Detail in the Handbook
- b Maintain minimum cavity width specified for chosen robustdetails® separating wall. This can be insulated in accordance with the specification for the chosen wall type.

### Slab components
